OBJECTIVE

Motivated Computer Science undergraduate at Carleton University seeking to build on a foundation in Python, Java, HTML, and CSS through hands-on software projects and internship or entry-level opportunities. Eager to apply strong problem-solving skills and leadership experience gained through school and community involvement to contribute to a collaborative team environment while continuing to grow as a developer.

EDUCATION

Carleton University Expected: 2031
Bachelor of Computer Science (Honours)

Sands National Academy Graduated: 2025
High School Diploma GPA: 4.0

HONORS & AWARDS

Entrance Scholarship – Bachelor of Computer Science (Honours), Carleton University 2026

- Awarded \$16,000 total (\$4,000 disbursed in the first year) in recognition of academic achievement upon admission.

President's Welcome Award for International Students, Carleton University 2026

- Awarded \$5,000 in recognition of academic merit as an incoming international student.

SKILLS

Programming: Python, HTML, C++, Java

Tools & Technologies: VS Code, Git/GitHub, basic command line usage

Core Competencies: Leadership, Teamwork, Communication, Problem-Solving, Time Management

EXPERIENCE

Class President – Sophomore Year, Sands National Academy Oct 2022 – Jun 2023

- Led class initiatives and represented student interests to school administration and faculty.
- Organized and coordinated class events, helping foster engagement among fellow students.
- Developed leadership, public speaking, and organizational skills through ongoing responsibilities.

Teaching Assistant – AP Computer Science Principles, Sands National Academy Nov 2024 – May 2025

- Assisted the instructor in delivering lessons on core computer science and programming concepts to classmates.
- Supported students during lab exercises and coding assignments, helping troubleshoot logic errors and reinforce concepts.
- Provided one-on-one guidance to students who were struggling with programming fundamentals.

Community Service Volunteer – The Children's Museum Jordan Oct 2024 – Jun 2025

- Completed 100 total hours of community service: 60 hours (Oct 2024 – Dec 2024) and 40 hours (May 2025 – Jun 2025).
- Assisted with museum programs and activities, supporting educational outreach and engagement for young visitors.

PROJECTS

Minesweeper – Personal Project (Python) Jun 2026

- Recreated the classic Windows Minesweeper game in Python, implementing grid generation, mine placement, and win/loss detection.
- Built recursive cell-reveal logic and a flagging system for marking suspected mines.

Calculator – Personal Project (Python) Jun 2026

- Built a calculator program in Python supporting addition, subtraction, multiplication, and division.
- Added input validation and error handling to manage invalid entries and division by zero.

Snake Game – AP CSP Performance Task (Scratch) April 2024

- Built the classic Snake game in Python, implementing movement, collision detection, and score tracking.
- Designed the core game loop and rendering logic to handle real-time player input and game state updates.

INVOLVEMENTS

Computer Science Club, Sands National Academy Nov 2024 – May 2025

- Participated in club meetings and activities focused on programming, technology, and computer science concepts.
